OVERVIEW

A wise man once said – We don't inherit the Earth from our ancestors, we borrow it from our children. The importance of nature is beyond verbal explanations. Saving nature is saving us from the threat. Hence, we should do anything and everything in our power, for our own good. 2020 showed us how the nature revived when people were forced to stay indoors due to pandemic. Blue skies, dolphins happily swimming and air as fresh as in the mountains. However, since staying indoors is not a practical solution, we need to look at ways on how to cut down on carbon footprints, greenhouse gases, melting of ice, cut down on landfills.

World Environment Conference 2023, teemed around **Save Nature, Save Future** will provide an ideal opportunity to discuss and debate technology in environment protection, policies in place and the road ahead. To be held on the World Environment Day, **WEC 23 would present** a global networking opportunity with policy makers, researchers, NGO, academicians and industrialists and government agencies. The conference is expected to be attended by around 2000 top professionals cutting across verticals and segments. From the Environment & Allied Industry, Entrepreneurs to Senior Purchase Professionals, industry leaders and experts, enterprise decision makers, Central and State Government Departments, PSUs, Private Sector Companies, Municipal Bodies , Development Authorities, environmental protection boards as well as the environmental protection institutions from India and abroad. Some of the topics that the conference will focus on are **Environment Protection, Climate Change, Carbon emissions, Green Building, Smart Cities, Sustainable Development, Saving the energy and natural resources**. The Conference will provide an ideal opportunity to the Indian professional to interact with the expert of environment Industry.
